EXPERIENCE

Junior Software Developer

June 2022 - Present

Company Name

Drevol Software • Vadodara, Gujarat

- Collaborate with seniors to troubleshoot and debug issues discovered during test execution.
- I effectively resolved bugs and contributed to writing unit tests(Jest), automation tests (Playwright), and integration tests using React.
- Actively Participant in daily stand-ups, meetings and provide updates on progress, discussion challenges, and coordinating efforts with team members.

Software Developer Intern

March 2022 - June 2022

Company Name

Alian Software • Anand, Gujarat

- Develop responsive websites and web applications that work seamlessly across different browsers and devices.
- Implement and customize Bootstrap framework to ensure consistent and visually appealing designs.
- Write clean, modular, and maintainable code following best practices and coding standards.
- Collaborate with the development team to understand project requirements and implement them.

PROJECTS

Dynamics 365 - Customer Insights Basically It's Micorosoft project.It is a customers platform that helps organizations provide personalized customer experiences.I am working on various modules, including data, measures, and segments, using technologies such as React.js and Fluent UI, alongside additional packages. My role involves solving any bugs we encounter and ensuring everything works properly by writing tests using Jest and Playwright.

Music App - NextJs The Music School App, featuring an Aceternity UI tailored for user interface, is built with Next.js and TypeScript! ([Take a closer look](#))

Redux Crud Build Redux-Toolkit CRUD application with React Hooks. We can create, retrieve, update, delete items.([Try it here](#))
